

Restoring Puget Sound . . .

offers a unique opportunity to partner with other agencies in reaching the general public with a positive, solution-oriented environmental message. It is designed to create a general awareness of the major issues, especially those the public can help solve through lifestyle changes. These large outdoor displays placed in highly visible public locations help people identify and connect with the Puget Sound ecosystem.

Restoring Our Home

Puget Sound is the lifeblood of our region... It's where many of us live, work and play. We rely on the Puget Sound for recreation, commerce, and industry... We're committed to protecting and restoring our Puget Sound for future generations.

Reducing Transportation Pollution

Reducing the amount of traffic on Puget Sound roads and bridges not only reduces air pollution but also improves traffic flow... We encourage you to carpool, use public transit, or use a bicycle when possible.

Easy ways to help

Save your grey sludge
Use your car products sparingly
Walk or use an alternative mode of transport
Maintain your car
Maintain your septic system

Maintain Your Septic System

Septic systems are used to treat wastewater when sewerage systems are not available... Regular maintenance is essential for proper operation.

Clean Boating Practices

Proper boating practices can help protect Puget Sound's water quality... Clean your boat, pump out your waste, and avoid using toxic substances.

Rural Landowners Can Help

Proper land use practices can help protect Puget Sound's water quality... Avoid fertilizers and pesticides, and use erosion control measures.

Sustainable Growth

Puget Sound's future growth should be sustainable... We encourage responsible development that protects our natural resources.

Wastewater Treatment Facilities

Wastewater treatment facilities are essential for protecting Puget Sound's water quality... We encourage you to support these facilities.

Household Hazardous Waste

Proper disposal of household hazardous waste is important... Don't pour it down the drain or throw it away in the trash.

Reduce Plastic Pollution in Puget Sound

Plastic pollution is a major threat to Puget Sound's marine life... We encourage you to reduce, reuse, and recycle.
